

# Walmanyjun Cable Beach Foreshore Redevelopment

SHIRE OF BROOME

## Unique Attributes

- Integrated program including demolition, civil and building works to upgrade beach access, public amenities, cultural interpretation, and coastal protection
- Construction of recreational facilities such as a new Skatepark, Basketball Court, Beach Gym, Shade Structures and BBQ areas, outdoor seating, and new garden beds
- Installation of lighting system, including both 3000K white lighting as well as unique amber lighting to accommodate Turtle breeding season

## Key Challenges

- Reprofilling of 4,000m<sup>2</sup> of existing sand dunes with coir matting, including removal more than 6,000m<sup>3</sup> of sand, before installing new paving and natural stone pathways, and construction works for upgrading public amenities, new community plaza, pedestrian access ramp, stairs and lookout point to the existing Surf Life Saving Club, and a new vehicle access ramp onto Cable Beach
- Extensive stakeholder engagement, including cultural heritage protection measures and live tourism operations
